EDUCATION

Denison University | Granville, OH

Expected May 2027

Bachelor of Arts, Computer Science

- **Relevant coursework:** Data Structures | Data Systems | Computer Systems | Applied Statistics | Functional Programming (Fall 2026)

RELEVANT SKILLS

Languages and libraries: Python, C++, Java, SQL, TypeScript, Pandas, Ocaml, langchain

Software Tools: Git, Linux, PostgreSQL, Google Cloud Storage, DBeaver, JupyterLab, VS Code, LaTeX

AI/ML: LLM evaluation & benchmarking, prompt engineering, agent orchestration, model fine-tuning, automated prompt and hyperparameter optimization, cost/quality tradeoff analysis

PROJECTS & RESEARCH

Levee Labs | Madison, WI

Summer 2026

Transformer Language Model (from scratch)

- Implemented a decoder-only GPT in raw PyTorch — hand-coded scaled dot-product self-attention (Q/K/V projections, causal masking, softmax), multi-head attention, and transformer blocks with residual connections and layer norm, using only base tensor primitives rather than any prebuilt transformer module.
- Built the full training pipeline (char-level tokenizer, batched data loader, AdamW loop, train/val loss estimation) and trained a ~200K-parameter model on TinyShakespeare to coherent text generation.

Levee Labs | Madison, WI

Summer 2026

LLM Evaluation Harness — AI Content Curation Platform

- Built an evaluation harness scoring generated newsletter editions across five dimensions (freshness, quality, prose, token cost, orchestration steps), combining deterministic code checks with an LLM-as-judge (Claude Sonnet, structured output) for semantic grading.
- Designed the judge to distinguish cross-edition staleness (repeating a prior day's story) from within-edition redundancy (two items covering the same news), scoring each as a separate failure mode.

Levee Labs | Madison, WI

Summer 2026

Automated Prompt & Config Optimization Loop — AI Content Curation Platform

- Contributed to, ran, and analyzed a closed-loop optimizer that mutates the platform's system prompts and inference config (model, temperature, tool budgets) against the eval harness, accepting or reverting candidates on a cost/quality gate.
- Extended the accept gate to price web-search API calls on the same cost-weighted scale as token usage, so candidates are judged on true total spend rather than LLM cost alone.

Levee Labs | Madison, WI

Summer 2026

LLM Fine-Tuning — AI Content Curation Platform

- Fine-tuned a foundation model on Google Cloud Vertex AI using a corpus of research files from the platform's generation agent, adapting it to the domain's structure and content.
- Built the training-data pipeline that captured and formatted agent tool-call traces into fine-tuning examples.

WORK EXPERIENCE

Levee Labs | Madison, WI

Summer 2026

Forward Deployed Engineering, Machine Learning Intern

- Built and evaluated LLM-based systems for an AI content curation platform — from-scratch transformer implementation, model fine-tuning, an evaluation harness, and a closed-loop prompt/config optimizer (*see Projects*).
- Worked across the full stack in TypeScript on Google Cloud (GCS, Vertex AI, Cloud SQL), committing changes to production generation and evaluation code.

THEO WOLF

Nakoma Golf Club | Madison, WI Summers 2024-2025

Head Swim Coach

- Directed a competitive swim program of 100+ athletes ages 6–18, designing practice plans, coordinating meet schedules, and overseeing all competitive events across the season.
- Recruited, hired, and trained a coaching staff of 6–8 assistants across two seasons, conducting performance evaluations and building a team culture focused on athlete development.
- Managed meet operations for 8+ events per season using specialized software for roster submissions, relay entries, and performance tracking.
- Maintained communication with 100+ parent families and club leadership through weekly updates and seasonal progress reports.

ON-CAMPUS LEADERSHIP AND INVOLVEMENT

Varsity Swim Team | Denison University

August 2023–Present

Varsity Athlete

- Competed in sprint freestyle for a program that won back-to-back NCAA Division III national championships (2025, 2026).
- Train 20+ hours weekly across a September–March competitive season plus year-round conditioning, while carrying a full academic course load.
- Mentor incoming freshman swimmers through the transition to collegiate-level training and competition.

Phi Kappa Psi Fraternity | Denison University

Spring 2025

Social Chair

- Planned and coordinated chapter social events for 50+ members, working with campus organizations and handling event logistics and recruitment outreach.
